Information Classification: GENERAL

OVERVIEW AND CONVENTIONS

MSCI ESG APIs are RESTful Web APIs that enable direct access to MSCI ESG reports and data over the internet, enabling the seamless integration of ESG Reports and data into client and third-party platforms.

Additional documentation is avaialble on the MSCI API Portal located here: https://developer.msci.com/apis/esg-report-api

ESG REPORTS API

The ESG Reports API offers direct access to the following MSCI ESG Reports in either HTML or PDF format:

1. AGR Report
2. BISR Report
3. ESG Controversies Report
4. ESG Fund Ratings Report
5. ESG Ratings Full Report
6. ESG Ratings Tearsheet
7. GovernanceMetrics Report
8. GovernanceMetrics Tearsheet
9. Government Ratings Report
10. Industry Report
11. Thematic Report
12. ClimateVaR Report
13. ClimateVaR Tearsheet

HTTP METHOD

Unless stated otherwise, all Web Services are using HTTP 'GET' method.

API VERSIONING

ESG APIs uses version numbers. If change is necessary to be made to an API that will break the current version then the version number will be changed.

METERING AND THROTTLING

To prevent misuse due to either malicious intent or programmatic errors and ensure continuous availability of API Services to all our Clients, MSCI implements Throttling (also referred to as Rate Limiting Features). Rate Limits are typically defined in terms of number of API requests made per minute and per day for an API Key.
These limits may be subject to commercial Terms & Conditions.

HTTP Response 429 - Too Many Requests is sent back by the API Server (Gateway) whenever a client breaches a predefined rate limit.
This response is also including a Retry-After header, specifying the number of seconds after which the request can be retried.

BACKWARD COMPATIBILITY

When changes are needed to an API, MSCI will strive to make them backward compatible.

© 2019 MSCI Inc. All rights reserved.

Information Classification: GENERAL

AUTHENTICATION

The following section describes machine to machine authentication.

To use MSCI Web Services, the user needs:

- Client Id
- Client Secret

Client Id and secret are obtained once and are reusable. To obtain an Client Id and secret,the client needs to call MSCI's client service.

STEP 1 – GENERATE CLIENT ID

1. Log in to the MSCI Customer Center using your MSCI credentials.
2. Select the OAuth 2.0 Client IDs tab.
3. In the top-right corner, click Request Client ID.
4. From the product drop-down list, select ESG.
5. Provide the required additional information– describe the purpose and indicate that you are requesting a new ID.
6. Select the I agree to MSCI terms check box.
7. Click Submit. You will receive an email with your Client ID.

Note that you must have an active subscription of the product for which you are requesting the Client ID.
A Client ID is generated and sent to the backend team for provisioning with the requested API.
You will receive an email confirmation once the ID is provisioned. You can also track the status from the MSCI Customer Center.

STEP 2 – GENERATE CLIENT SECRET

1. Once you receive an email confirmation that your Client ID is provisioned, go to the MSCI Customer Center again. Select the OAuth 2.0 Client IDs tab.
2. Select the OAuth 2.0 Client IDs tab.
3. Locate the new Client ID that was assigned to you, as described in the previous section.
4. Click Generate Secret. For security reasons, this is a one-time activity that is visible in the portal only at the time of generation.
5. Save your IDs in a safe place. If you require assistance with this process, contact your MSCI representative. Note that MSCI does not store the API Secret.

STEP 3 – OBTAIN TOKEN

Once you have the Client ID and Client Secret, you need to make an API call to obtain the token.

Auth Server URL https://accounts.msci.com/oauth/token
Request Type POST
Body
client_id: <Client_ID>
client_secret: <Client_Secret>
grant_type: "client_credentials"
audience: "https://esg/report"

© 2019 MSCI Inc. All rights reserved.

Information Classification: GENERAL

Response of a successful call contains the access token and expiry time.
Use the access token as a bearer token for further API communication.
To ensure security, all API requests must be made over HTTPS.

EXPIRY OF TOKEN: 24 HOUR

After Token expires, we will get “401 unauthorized” response.
The same procedure must be followed to produce a new token once the previous one expires.

CODE EXAMPLE OF USAGE:
CURL:

(TOKEN GENERATION) –

```
curl -X POST \
https://accounts.msci.com/oauth/token/ \
-H 'Content-Type: application/json' \
-d '{
"grant_type": "client_credentials",
"client_id": "**Client-Id-value**",
"client_secret": "**Client-Secret-value**",
"audience": https://esg/report
}'
```

(API REQUEST) –

```
curl –H “Authorization: Bearer
***bearer token value***”
-X GET " https://api.msci.com/esg/report/v2.0/reports/esgRatingsReport/IID000000002143620”
```

JAVA :

(TOKEN GENERATION) –

```
OkHttpClient client = new OkHttpClient();
MediaType mediaType = MediaType.parse("application/json");
RequestBody body = RequestBody.create(mediaType, "{ \"grant_type\":
\"client_credentials\"," +
" \"client_id\": \"**Client-Id-Value**\"," +
" \"client_secret\": \"**Client-Secret-Value**\"," +
" \"audience\": \"https://esg/report\"" +
"}");
Request request = new Request.Builder()
.url("https://accounts.msci.com/oauth/token/")
.post(body)
.addHeader("Content-Type", "application/json")
.build();
Response response = client.newCall(request).execute();
```

(API REQUEST) –

© 2019 MSCI Inc. All rights reserved.

Information Classification: GENERAL

```
OkHttpClient client = new OkHttpClient();
Request request = new Request.Builder()
.url("https://api.msci.com/esg/report/v2.0/reports/esgRatingsReport/
IID000000002143620").get()
.addHeader("Authorization", "Bearer **Bearer-Token-Value").build();
Response response = client.newCall(request).execute();
```

PYTHON :

(TOKEN GENERATION) –

```
import http.client
import json
conn = http.client.HTTPSConnection("accounts.msci.com")
payload = json.dumps{"grant_type": "client_credentials",
"client_id": "**Client-Id-value**",
"client_secret": "**Client-Id-value**",
"audience": "https://esg/report"})
headers = {
'Content-Type': ‘application/json’}
conn.request("POST", "/oauth/token/", payload, headers)
res = conn.getresponse()
data = res.read()
print(data.decode("utf-8"))
```

(API REQUEST) –

```
import http.client
conn = http.client.HTTPSConnection("api.msci.com")
headers = {'Authorization': ‘Bearer **Bearer Token Value**’}
payload = ‘’
conn.request("GET",
"/esg/report/v2.0/reports/esgRatingsReport/IID000000002143620", payload,
headers)
res = conn.getresponse()
data = res.read()
print(data.decode("utf-8"))
```

ESG REPORTS API

The base URL of the ESG Reports API is https://api.msci.com/esg/report/v2.0

© 2019 MSCI Inc. All rights reserved.

Information Classification: GENERAL

DESCRIPTION

The ESG Report API is used to provide clients with a means to access ESG documents and reports for companies, funds, industries, and more. Reports are available as PDF documents and many reports are also available in HTML. Access to reports is governed by permissions associated with the account that is used in the API call.

AUTHENTICATION DETAILS

Use basic authentication header with: API Key/Secret Email/password Internal technical account (sys_*)

ENDPOINTS LIST

Endpoint	Description
/reports/	Return a list of routes provided by the API based on client permissions
/reports/{issuerId}	Return a list of all ESG related reports for the given issuer id
/reports/esgRatingsTearsheet/{issuerId}	Return an ESG Ratings Tearsheet for the company identified by the issuer id
/reports/esgRatingsReport/{issuerId}	Return an ESG Ratings Report for the company identified by the issuer id
/reports/accessories	Return a list of available ESG Manager Accessories (Excel Templates/Documentation)
/reports/accessory/{accessoryId}	Return a specific accessory document based on the accessory ID
/reports/agrReport/{issuerId}	Return an AGR Report for the company identified by the issuer id
/reports/bisrReport/{issuerId}	Return a Business Involvement Screening Report (BISR) for the company identified by the issuer id.
/reports/esgControversiesReport/{issuerId}	Return an ESG Controversies Report for the company identified by the issuer id
/reports/fundMetricsReport/{fundId}	Return a Fund Ratings Report for the issuer identified by the fund id
/reports/governanceMetricsReport/{issuerId}	Return a Governance Metrics Report for the company identified by the issuer id
/reports/governanceMetricsTearsheet/{issuerId}	Return a Governance Metrics Tearsheet for the company identified by the issuer id
/reports/governmentRatingsReport/{issuerId}	Return a Government Ratings Report for the company identified by the issuer id
/reports/industryReport/{industryId}	Return an Industry Report for the industry identified by the industry id
/reports/industryReports	Return a List of available Industry Reports
/reports/thematicReport/{documentId}	Return the thematic report identified by the given document ID
/reports/thematicReports	Return a list of available ESG Thematic Reports
/reports/climateVaRReport/{issuerId}	Return Climate VaR Report for the company identified by the issuer id
/reports/climateVaRTearsheet/{issuerId}	Return Climate VaR Tearsheet for the company identified by the issuer id

Information Classification: GENERAL

ENDPOINTS DETAIL

/REPORTS/

Return a list of routes provided by the API based on user permissions

SERVICE URLS:

https://api.msci.com/esg/report/v2.0/reports/

ENDPOINT DESCRIPTION

This endpoint will return a JSON object, in HATEOAS format, which displays the available routes that are available to the caller. The routes are based on the features that have been granted to the calling user. The result displays links in templated form which can be used to interact with the API.

For example, a user with complete access to all reports might see something like this:

```
{
  "_links": {
    "self": {
      "href": "https://api.msci.com/esg/report/v2.0/reports/"
    },
    "accessories": {
      "href": "https://api.msci.com/esg/report/v2.0/reports/accessories"
    },
    "accessory": {
      "href": "https://api.msci.com/esg/report/v2.0/reports/accessory/{accessoryId}",
      "templated": true
    },
    "thematicReports": {
      "href": "https://api.msci.com/esg/report/v2.0/reports/thematicReports"
    },
    "thematicReport": {
      "href": "https://api.msci.com/esg/report/v2.0/reports/thematicReport/{documentId}",
      "templated": true
    },
    "ivaIndustryReports": {
      "href": "https://api.msci.com/esg/report/v2.0/reports/ivaIndustryReports"
    },
    "issuerReports": {
      "href": "https://api.msci.com/esg/report/v2.0/reports/{issuerId}{?idtype}",
      "templated": true
    },
    "agrReport": {
      "href": "https://api.msci.com/esg/report/v2.0/reports/agrReport/{issuerId}{?idtype,name}",
      "templated": true
    },
    "esgControversiesReport": {
      "href": "https://api.msci.com/esg/report/v2.0/reports/esgControversiesReport/{issuerId}{?idtype,name,format}",
      "templated": true
    },
     "esgRatingsReport": {
      "href": "https://api.msci.com/esg/report/v2.0/reports/esgRatingsReport/{issuerId}{?idtype,name,format}",
      "templated": true
    },
    "esgRatingsTearsheet": {
      "href": "https://api.msci.com/esg/report/v2.0/reports/esgRatingsTearsheet/{issuerId}{?idtype,name,format}",

}
```

REQUEST

Service URLs:

https://api.msci.com/esg/report/v2.0/reports/esgRatingsTearsheet/{issuerId}

HTTP Method:

GET

RESPONSE

Possible Outputs

Status	Description
200	OK
401	Unauthorized
403	No subscription available for this data
406	Mismatched Accept and Content Values
500	Unexpected Server Error
503	Service Unavailable

Output Encoding

application/json

Output Description

The result of the reports route is a list of the routes that are available to the calling user. Only routes that the user is permitted to access are returned. The result is a HAL format HATEOAS JSON output using the specification found here - https://tools.ietf.org/html/draft-kelly-json-hal-08

Response Body Returned

Possible outputs for status: 200

}
```

CODE SAMPLES

cURL

```
curl -i -X GET https://api.msci.com/esg/report/v2.0/reports/
```

Python

```
import requests url = "https://api.msci.com/esg/report/v2.0/reports/"; headers = { } response
= requests.request("POST", url, headers=headers) print(response.text)
```

Java

The following example uses Unirest for Java, a lightweight HTTP request library. Click here for more information.

```
HttpResponse response = Unirest.get("https://api.msci.com/esg/report/v2.0/reports/")
.asString();
```

C#

```
var client = new RestClient("https://api.msci.com/esg/report/v2.0/reports/"); var request =
new RestRequest(Method.GET); IRestResponse response = client.Execute(request);
```

Information Classification: GENERAL

/REPORTS/{ISSUERID}/

Return a list of all ESG related reports for the given issuer id

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/{issuerId}

ENDPOINT DESCRIPTION

This endpoint will return a list of all ESG Reports that are available for the given issuer id based on the permissions associated with the calling user. Only reports that exist and are available to the user will be included in the list. The result is a JSON object in HATEOAS format and includes links that can be used to download the reports. The following is an abbreviated sample of what can be produced and will vary based on user permissions:

```
{
  "issuerName": "3M COMPANY",
  "issuerId": "IID000000002155335",
  "issuerIsin": "US88579Y1010",
  "issuerDomicile": "United States of America",
  "ivaIndustryName": "Industrial Conglomerates",
  "ivaIndustryCode": "12923",
  "_embedded": {
    "availableReports": [
      {
        "reportName": "AGR Report",
        "issuerName": "3M COMPANY",
        "lastUpdated": "2018-07-18T13:30:15.323+0000",
        "_links": {
          "self": {
            "href":
"https://api.msci.com/esg/report/v2.0/reports/agrReport/IID000000002155335"
          }
        }
      },
      {
        "reportName": "BISR Report",
        "issuerName": "3M COMPANY",
        "_links": {
          "self": {
            "href":
"https://api.msci.com/esg/report/v2.0/reports/bisrReport/IID000000002155335"
```

/REPORTS/ESGRATINGSTEARSHEET/

Return an ESG Ratings Tearsheet for the company identified by the issuer id

ENDPOINT DESCRIPTION

This method will return an ESG Ratings Tearsheet, in PDF or HTML format for the given issuer id. The default report format is PDF, but an optional query parameter of format=html|pdf can be specified to indicate an alternate format. The proper HTTP Accept header must be set as well. When retrieving a PDF, Application/PDF must be one of the values in the Accept header, similarly for HTML, Text/HTML must be included. We also recommend that Application/JSON be included as an Accept header for all requests so that if an error occurs, the caller can receive a JSON response with information about the error. Issuers are identified by an MSCI Issuer ID by default. Optionally the call may use an ISIN value if the request contains the optional parameter idtype=isin.

REQUEST

© 2019 MSCI Inc. All rights reserved.

Information Classification: GENERAL

Service URLs:

https://api.msci.com/esg/report/v2.0/reports/esgRatingsTearsheet/{issuerId}

HTTP Method:

GET

Path Parameters

Name	Type	Mandatory	Description
issuerId	string	☐	The issuerid field is required when requesting a report resource. The id will identify the issuer that is the subject of the requested report. Issuer IDs can be specified either as an MSCI Issuer ID value, or as an ISIN value.

Query Parameters

Name	Type	Mandatory	Default value	Accepted values	Description
idtype	string		issuerid	issuerid, isin	The idtype field is used to control the factor that is used to identify the issuer. By default the idtype will be an MSCI Issuer ID, however the API also supports issuer lookup by ISIN
name	string				The name option can be used to assign a specific name for the output report. By default, the name of the report is a combination of the report type and the issuer name.
format	string		pdf	pdf, html	This report is available as a PDF or HTML document. The default result is PDF but if html is specified as a parameter **format=html** The document will be returned as HTML. The value of the accept header must match the desired report format. If the Accept header only contains Application/PDF and a format of HTML is specified, a 406 error will be returned. If an accept header of */* is specified, both report formats can be returned without error.

Headers

Name	Type	Mandatory	Description
Accept	string	☐	When requesting a report, an accept header may be specified, but it is not required. The default report type will be returned if no Accept header is given. If an accept header **is** specified, please ensure that it matches the expected result. A header value of */* will ensure that the result matches, otherwise an HTTP status code of 406 may be returned.

RESPONSE

© 2019 MSCI Inc. All rights reserved.

Information Classification: GENERAL

Possible Outputs

Status	Description
200	Success
401	Unauthorized
403	No subscription available for this data
404	No document was found
422	Unrecognized Issuer Id
500	Unexpected Server Error
503	Service Unavailable

Output Encoding

text/html, application/pdf

Output Description

Name	Type	Mandatory	Description
body	byte		

HTTP Status: 401 – Unauthorized

An HTTP Status of 401 is returned whenever the user is not authorized to access the given endpoint. This error could happen because of invalid credentials or in rare circumstances because of a failure on the server side. Please contact client services if you are seeing 401 errors when you are certain you are passing the correct credentials.

Response Body Returned:

Name	Type	Mandatory	Description
body	Error Status Details		
status	string		This field contains the generic response status
timestamp	date_time		This field contains a time stamp value indicating the time the event occurred
message	string		This field contains a more detailed message about the cause of the error status

Sample Output:

```
{
  "status": "UNAUTHORIZED",
  "timestamp": "2018-06-04 03:15:23",
  "message": "Access is denied"
}
```

Information Classification: GENERAL

HTTP Status: 403 - No subscription available for this data

An HTTP Status of 403 is returned when a request is made to retrieve a report for a specific issuer and the caller does not have access to the data necessary to produce the report. For example, a user might have access to US data, but the user requests a European based company. The request will fail with a 403 because the caller does not have access to the report for the specified issuer. If the caller makes a request for a US based issuer, the request would complete successfully.

Response Body Returned:

Name	Type	Mandatory	Description
body	Error Status Details		
status	string		This field contains the generic response status
timestamp	date_time		This field contains a time stamp value indicating the time the event occurred
message	string		This field contains a more detailed message about the cause of the error status

Sample Output:

```
{
    "status": "FORBIDDEN",
    "timestamp": "2018-06-01 11:40:00",
    "message": "This account does not have access to reports for this issuer"
}
```

HTTP Status: 404 - No document was found

An HTTP Status of 404 is returned whenever a request is made for a report or document that does not exist in the system.

Response Body Returned:

Name	Type	Mandatory	Description
body	Error Status Details		
status	string		This field contains the generic response status
timestamp	date_time		This field contains a time stamp value indicating the time the event ocurred
message	string		This field contains a more detailed message about the cause of the error status

Sample Output:

```
{
    "status": "NOT_FOUND",
    "timestamp": "2018-06-01 03:44:18",
```

© 2019 MSCI Inc. All rights reserved.

Information Classification: GENERAL

```
    "message": "The requested item was not found"
}
```

HTTP Status: 422 - Unrecognized Issuer Id

An HTTP Status of 422 is returned if the request contains an issuer identifier that is not recognized. The ID could be malformed, or no matching issuer was found with the given ID. The response indicates that all parameters were syntactically correct, but the request could not be completed because of a semantic error

Response Body Returned:

Name	Type	Mandatory	Description
body	Error Status Details		
status	string		This field contains the generic response status
timestamp	date_time		This field contains a time stamp value indicating the time the event ocurred
message	string		This field contains a more detailed message about the cause of the error status

Sample Output:

```
{
    "status": "UNPROCESSABLE_ENTITY",
    "timestamp": "2018-06-01 11:35:00",
    "message": "No issuer could be located with an id of IID0000000021404403 using issuerId."
}
```

HTTP Status: 500 - Unexpected Server Error

An HTTP Status of 500 is returned whenever there was a service error in the API. These are unexpected events that will be logged and investigated. If the error continues, please report the problem to MSCI Client Services.

Response Body Returned:

Name	Type	Mandatory	Description
body	Error Status Details		
status	string		This field contains the generic response status
timestamp	date_time		This field contains a time stamp value indicating the time the event ocurred
message	string		This field contains a more detailed message about the cause of the error status

Sample Output:

```
{
    "status": "INTERNAL_SERVER_ERROR",
    "timestamp": "2018-06-01 03:45:29",
    "message": "Unable to retrieve requested report"
```

© 2019 MSCI Inc. All rights reserved.

Information Classification: GENERAL

```
}
```

HTTP Status: 503 - Service Unavailable

A HTTP Status of 503 can occur when the API service code makes a call to a downstream service and the downstream service fails. There is no action that can be taken by the user to correct this situation. If it persists, MSCI Client Services should be contacted.

Response Body Returned:

Name	Type	Mandatory	Description
body	Error Status Details		
status	string		This field contains the generic response status
timestamp	date_time		This field contains a time stamp value indicating the time the event ocurred
message	string		This field contains a more detailed message about the cause of the error status

Sample Output:

```
{
    "status": "SERVICE_UNAVAILABLE",
    "timestamp": "2018-06-04 03:04:27",
    "message": "Unable to retrieve requested report due to a downstream service problem."
}
```

```

/REPORTS/ESGRATINGSREPORT/{ISSUERID}

Return an ESG Ratings Report for the company identified by the issuer id

ENDPOINT DESCRIPTION

This method will return an ESG Ratings Report in PDF or HTML format for the given issuer id. The default report format is PDF, but an optional query parameter of format=html|pdf can be specified to indicate an alternate format. The proper HTTP Accept header must be set as well. When retrieving a PDF, Application/PDF must be one of the values in the Accept header, similarly for HTML, Text/HTML must be included. We also recommend that Application/JSON be included as an Accept header for all requests so that if an error occurs, the caller can receive a JSON response with information about the error. Issuers are identified by an MSCI Issuer ID by default. Optionally the call may use an ISIN value if the request contains the optional parameter idtype=isin.

Information Classification: GENERAL

https://api.msci.com/esg/report/v2.0/reports/esgRatingsReport/{issuerId}

/REPORTS/ACCESSORIES

Return a list of available ESG Manager Accessories (Excel Templates/Documentation)

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/accessories

ENDPOINT DESCRIPTION

'Accessories' are documents related to the Excel Template capability available as a purchased option with ESG Manager. The documents are Excel macro files and other documents which describes how to use the templates. The result of this call is a JSON object containing information about each available accessory, in HATEOAS format. Each document will include a link to the document. The following is an abbreviated sample of what can be produced:

```
{
  "_embedded": {
    "documentList": [
      {
        "name": "ESG Baseline Excel: Version 1.91",
        "format": "other",
        "system_id": "MSCIESGBaseline",
        "description": "The Baseline Excel Extension makes use of Excel’s flexibility and
charting capability to allow users to develop their own reporting templates. With a click of
a button, users get real-time results from ESG Manager for selected factors and companies.
This is a powerful tool for Excel users who want to build their own reports and also an easy
tool for users who want to quickly download data from ESG Manager in Excel.",

/REPORTS/ACCESSORY/{ACCESSORYID}

Return a specific accessory document based on the accessory ID

ENDPOINT DESCRIPTION

This route will return a specific accessory based on its ID. It is recommended that a caller first call the /reports/accessories route which will return a list of available accessories. The result of the /reports/accessories call is in HATEOAS format, so there will be pre-built links to each of the available accessories. Alternatively, the caller can use the accessory id information provided by the /reports/accessories route to create requests for specific accessory documents.

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/accessory/{accessoryId}

/REPORTS/AGRREPORT/{ISSUERID}

Return an AGR Report for the company identified by the issuer id

ENDPOINT DESCRIPTION

This method will return an AGR Report, in PDF format, for the specified issuer id. An issuer can be identified by an MSCI Issuer ID, or an ISIN. If an ISIN is specified, the request requires the inclusion of the query parameter idtype=isin.

SERVICE URLS

© 2019 MSCI Inc. All rights reserved.

Information Classification: GENERAL

https://api.msci.com/esg/report/v2.0/reports/agrReport/{issuerId}

/REPORTS/BISRREPORT/{ISSUERID}

Return a BISR Report for the company identified by the issuer id.

ENDPOINT DESCRIPTION

This method will return a BISR report, in PDF format, for the given issuer id. If an error occurs during processing, a JSON response will be returned. We recommend that an Accept header be included in the request with values that match the desired output. Additionally, we recommend including the Application/JSON value in the accept header so as to be able to view the JSON response in the event of an error. When making the request, an issuer is identified by an MSCI Issuer ID. Alternatively, the call may use an ISIN value to identify the issuer if the request contains the optional parameter, idtype=isin.

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/bisrReport/{issuerId}

/REPORTS/ESGCONTROVERSIESREPORT/{ISSUERID}

Return an ESG Controversies Report for the company identified by the issuer id

ENDPOINT DESCRIPTION

This method will return an ESG Controversies Report, in PDF or HTML format for the given issuer id. The default report format is PDF, but an optional query parameter of format=html|pdf can be specified to indicate an alternate format. The proper HTTP Accept header must be set as well. When retrieving a PDF, Application/PDF must be one of the values in the Accept header, similarly for HTML, Text/HTML must be included. We also recommend that Application/JSON be included as an Accept header for all requests so that if an error occurs, the caller can receive a JSON response with information about the error. Issuers are identified by an MSCI Issuer ID by default. Optionally the call may use an ISIN value if the request contains the optional parameter idtype=isin.

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/esgControversiesReport/{issuerId}

/REPORTS/FUNDMETRICSREPORT/{FUNDID}

Return a Fund Ratings Report for the issuer identified by the fund id

ENDPOINT DESCRIPTION

Returns a PDF or HTML version of the Fund Ratings Report for the given fund id. By default the fund ID should be an ISIN value, but it is possible to send in an Lipper shareClassId as well. To do this, the optional parameter idtype=shareclassid must be specified. The Fund Ratings Report is currently a dynamically generated report, so report retrieval may take more time than other reports.

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/fundMetricsReport/{fundId}

Information Classification: GENERAL

/REPORTS/GOVERNANCEMETRICSREPORT/{ISSUERID}

Return a Governance Metrics Report for the company identified by the issuer id

ENDPOINT DESCRIPTION

This method will return a Governance Metrics Report, in PDF or HTML format for the given issuer id. The default report format is PDF, but an optional query parameter of format=html|pdf can be specified to indicate an alternate format. The proper HTTP Accept header must be set as well. When retrieving a PDF, Application/PDF must be one of the values in the Accept header, similarly for HTML, Text/HTML must be included. We also recommend that Application/JSON be included as an Accept header for all requests so that if an error occurs, the caller can receive a JSON response with information about the error. Issuers are identified by an MSCI Issuer ID by default. Optionally the call may use an ISIN value if the request contains the optional parameter idtype=isin.

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/governanceMetricsReport/{issuerId}

/REPORTS/GOVERNANCEMETRICSTEARSHEET/{ISSUERID}

Return a Governance Metrics Tearsheet for the company identified by the issuer id

ENDPOINT DESCRIPTION

This method will return a Governance Metrics Tearsheet in PDF or HTML format for the given issuer id. The default report format is PDF, but an optional query parameter of format=html|pdf can be specified to indicate an alternate format. The proper HTTP Accept header must be set as well. When retrieving a PDF, Application/PDF must be one of the values in the Accept header, similarly for HTML, Text/HTML must be included. We also recommend that Application/JSON be included as an Accept header for all requests so that if an error occurs, the caller can receive a JSON response with information about the error. Issuers are identified by an MSCI Issuer ID by default. Optionally the call may use an ISIN value if the request contains the optional parameter idtype=isin.

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/governanceMetricsTearsheet/{issuerId}

/REPORTS/GOVERNMENTRATINGSREPORT/{ISSUERID}

Return a Government Ratings Report for the company identified by the issuer id

ENDPOINT DESCRIPTION

This method will return a Government Ratings Report, in PDF or HTML format for the given issuer id. The default report format is PDF, but an optional query parameter of format=html|pdf can be specified to indicate an alternate format. The proper HTTP Accept header must be set as well. When retrieving a PDF, Application/PDF must be one of the values in the Accept header, similarly for HTML, Text/HTML must be included. We also recommend that Application/JSON be included as an Accept header for all requests so that if an error occurs, the caller can receive a JSON response with information about the error. Issuers are identified by an MSCI Issuer ID by default. Optionally the call may use an ISIN value if the request contains the optional parameter idtype=isin.

Information Classification: GENERAL

/REPORTS/INDUSTRYREPORT/{INDUSTRYID}

Return an Industry Report for the industry identified by the industry id

ENDPOINT DESCRIPTION

This method will return an Industry Report, in PDF format for the given industry id. The industry is identified by an MSCI IVA Industry ID. It is recommended that callers use the /industryReports route to get a full list of available industries. This request will also include links to each of the available reports, including the industry id.

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/industryReport/{industryId}

/REPORTS/INDUSTRYREPORTS

Return a List of available Industry Reports

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/industryReports

ENDPOINT DESCRIPTION

This request will return a JSON object in HATEOAS format with information about all available Industry Reports. The result will look something like this (this is a partial list of reports):

```
{
  "_embedded": {
    "industryList": [
      {
        "industryId": "12882",

/REPORTS/THEMATICREPORT/{DOCUMENTID}

eturn the thematic report identified by the given document ID

ENDPOINT DESCRIPTION

This endpoint returns an ESG thematic report in PDF format. Thematic Reports are ad-hoc ESG reports that relate to an ESG Topic but not a specific issuer. The reports returned here are the same as what is available in ESG Manager on the Reports & Publications page. Report types may be restricted based on user permissions. Only users authorized to view the report in ESG Manager will be able to download the report.

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/thematicReport/{documentId}

/REPORTS/THEMATICREPORTS

Return a list of available ESG Thematic Reports

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/thematicReports

ENDPOINT DESCRIPTION

'Thematic Reports' are documents on various ESG related topics and are not specific to any particular issuer or industry. Most of the documents will be in PDF format. The result of this call is a JSON object containing information about each available thematic report, in HATEOAS format. Each description will include a link which can be used to retrieve the corresponding report. The availability of reports is controlled by the access available to the account associated with the calling user id or token. The following is an abbreviated sample of what can be produced:

```
{

```

/REPORTS/CLIMATEVARREPORT/{ISSUERID}

Return Climate VaR Report for the company identified by the issuer id.

ENDPOINT DESCRIPTION

© 2019 MSCI Inc. All rights reserved.

Information Classification: GENERAL

This method will return the full ClimateVaR Report in PDF format for the given issuer id. When retrieving a PDF, Application/PDF must be one of the values in the Accept header, similarly for HTML, Text/HTML must be included. We also recommend that Application/JSON be included as an Accept header for all requests so that if an error occurs, the caller can receive a JSON response with information about the error.

The issuerId is an identifier for the company whose report is being requested. This identifier can be the MSCI issuer ID value, ISIN, or other identifier value that maps to a single company. Reports will only be returned if the identifier matches a known issuer, and that issuer is in the requester's issuer universe.

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/climateVaRReport/{issuerId}

/REPORTS/CLIMATEVARTEARSHEET/{ISSUERID}

Return Climate VaR Tearsheet for the company identified by the issuer id.

Endpoint description

This method will return the full ClimateVaR Tearsheet in PDF format for the given issuer id. When retrieving a PDF, Application/PDF must be one of the values in the Accept header, similarly for HTML, Text/HTML must be included. We also recommend that Application/JSON be included as an Accept header for all requests so that if an error occurs, the caller can receive a JSON response with information about the error.

The issuerId is an identifier for the company whose report is being requested. This identifier can be the MSCI issuer ID value, ISIN, or other identifier value that maps to a single company. Reports will only be returned if the identifier matches a known issuer, and that issuer is in the requester's issuer universe

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/climateVaRTearsheet/{issuerId}

/REPORTS/{ISSUERID}

Return a list of all ESG related reports for the given issuer id

SERVICE URLS

https://api.msci.com/esg/report/v2.0/reports/{issuerId}

ENDPOINT DESCRIPTION

This endpoint will return a list of all ESG Reports that are available for the given issuer id based on the permissions associated with the calling user. Only reports that exist and are available to the user will be included in the list. The result is a JSON object in HATEOAS format and includes links that can be used to download the reports. The following is an abbreviated sample of what can be produced and will vary based on user permissions:

```
{
  "issuerName": "3M COMPANY",
  "issuerId": "IID000000002155335",

ABOUT MSCI ESG RESEARCH PRODUCTS AND SERVICES

MSCI ESG Research products and services are provided by MSCI ESG Research LLC, and are designed to provide in-depth research, ratings and analysis of environmental, social and governance-related business practices to companies worldwide. ESG ratings, data and analysis from MSCI ESG Research LLC. are also used in the construction of the MSCI ESG Indexes. MSCI ESG ResearchLLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc.

ABOUT MSCI

For more than 40 years, MSCI's research-based indexes and analytics have helped the world's leading investors build and manage better portfolios. Clients rely on our offerings for deeper insights into the drivers of performance and risk in their portfolios, broad asset class coverage and innovative research.

Our line of products and services includes indexes, analytical models, data, real estate benchmarks and ESG research.

MSCI serves 99 of the top 100 largest money managers, according to the most recent P&I ranking.

NOTICE AND DISCLAIMER

This document and all of the information contained in it, including without limitation all text, data, graphs, charts (collectively, the "Information") is the property of MSCI Inc. or its subsidiaries (collectively, "MSCI"), or MSCI's licensors, direct or indirect suppliers or any third party involved in making or compiling any Information (collectively, with MSCI, the "Information Providers") and is provided for informational purposes only. The Information may not be modified, reverse-engineered, reproduced or redisseminated in whole or in part without prior written permission from MSCI.

The Information may not be used to create derivative works or to verify or correct other data or information. For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investible assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of www.msci.com.

MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI's products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research. MSCI ESG Research materials, including materials utilized in any MSCI ESG Indexes or other products, have not been submitted to, nor received approval from, the United States Securities and Exchange Commission or any other regulatory body.

Any use of or access to products, services or information of MSCI requires a license from MSCI. MSCI, Barra, RiskMetrics, IPD, and other MSCI brands and product names are the trademarks, service marks, or registered trademarks of MSCI or its subsidiaries in the United States and other jurisdictions. The Global Industry Classification Standard (GICS) was developed by and is the exclusive property of MSCI and Standard & Poor's. "Global Industry Classification Standard (GICS)" is a service mark of MSCI and Standard & Poor's.
